ABSTRACT
        Data quality and speed in data processing profoundly affect
service provided to the Educational Resources Information Center's (ERIC's)
broad audiences. With these factors in mind, a new technology infrastructure
for processing records has been acquired and is scheduled for implementation.
The story of how the ERIC database is being constructed is featured in this
annual report, as are highlights of recent acquisitions. A review of the year
2000 includes discussion of the ERIC database growth in 2000; database
content; database access; document delivery; information sharing; and
system-wide improvements. The individual ERIC Clearinghouses and support
components also report their accomplishments and provide lists of their
best-selling publications and recent ERIC Digest titles. A description of
ERIC's users services--which include reference and retrieval services, access
to Internet resources, literature searches, bibliographies, identification of
popular documents, and referrals to other sources of information--is
provided. An ERIC system directory and an outline of the ERIC budget are also
included. (AEF)

Educational Resources Information Center

ANNUAL REPORT 2001

SUMMARIZING THE RECENT ACCOMPLISHMENTS OF THE EDUCATIONAL RESOURCES INFORMATION CENTER

Educational Resources Information Center • National Library of Education
Office of Educational Research and Improvement • U.S. Department of Education

2

ERIC Mission and Audience

The Educational Resources Information Center (ERIC) is a federally funded, nationwide information network that has been providing ready access to education literature since 1966. At the heart of ERIC is the largest education database in the world—containing more than 1 million bibliographic records.

Mission

The mission of the ERIC system is to improve American education by increasing and facilitating the use of educational research and information to improve practice in learning, teaching, educational decision making, and research, wherever and whenever these activities take place.

Audience

The ERIC audience includes teachers, professors, and librarians; school and college administrators, counselors, instructional media staff, and support personnel; educational researchers; educational policymakers at every level; students and nonformal learners at every age and level, including adult learners; parents; health and social services personnel and caregivers who support families, parents, students, and children; and the media and business communities as they relate to education.

ANNUAL REPORT 2001

SUMMARIZING

THE

RECENT ACCOMPLISHMENTS

OF THE

EDUCATIONAL RESOURCES

INFORMATION CENTER

Foreword

W hen ERIC directors met in October 2000, they articulated a vision of the ERIC system as reliable, speedy, usable, and of high quality. The process of translating this vision into results for ERIC customers has generated a renewed focus on improving the accessibility and usability of ERIC's database of educational literature.

Data quality and speed in data processing profoundly affect service provided to ERIC's broad audiences. With these factors in mind, a new technology infrastructure for processing records has been acquired and is scheduled for implementation in 2001. This implementation process will include an examination of the procedures for retrieving Internet resources for the ERIC system. We encourage everyone to watch the new technology unfold and to access the ERIC database and clearinghouse system by using the new Web page address, http://www.eric.ed.gov.

The story of how the ERIC database is being constructed is featured in this annual report, as are highlights of recent acquisitions. The individual ERIC clearinghouses and support components have also reported their accomplishments and have provided lists of their bestselling publications and recent ERIC Digest titles. We invite you to read the record of what ERIC has accomplished.

Luna Levinson
Director of ERIC

ERIC

ERIC

The ERIC Database: Review of the Year 2000

I n keeping with the ERIC tradition begun in 1966, ERIC continues to build and maintain the world's largest education database. The database enables anyone who needs information on education to locate journal articles, conference papers, research and technical reports, project descriptions, books, teaching guides, evaluation reports, and many other types of materials.

Database Growth in 2000

In 2000, 32,427 new records were added to the ERIC database: abstracts of 10,268 documents and abstracts of 22,159 journal articles. The entire bibliographic database, covering the period 1966–2000, totals 1,045,081 records.

The database is being built by the 16 ERIC Clearinghouses, which acquire and select articles and documents in their scope areas; catalog, abstract, and index them; and send them to the central ERIC Processing and Reference Facility. The Facility performs final editing and combines records from all clearinghouses into the database.

The results of your expeditious response to my cry for help were nothing short of sensational, particularly in light of my own fruitless efforts. I wanted to extend a note of eternal gratitude....The service truly is an undisguised blessing for those of us in the throes of the life-altering, life-consuming experience of dissertation writing. Again, thank you.

—A message from a
graduate student
to the ERIC
Clearinghouse on
Reading, English,
and Communication

Sample Titles Added to the ERIC Database in 2000

Becker, Ruth R. Spring 2000. "The Critical Role of Students' Questions in Literacy Development." *Educational Reform* Vol. 64 (Issue 3).

Campbell, Bob, and Fred Lubben. March 2000."Learning Science through Contexts: Helping Pupils Make Sense of Everyday Situations." *International Journal of Science Education* Vol. 22 (Issue 3).

Gullo, Dominic F. February 2000. "The Long Term Educational Effects of Half-Day vs. Full-Day Kindergarten." *Early Child Development and Care* Vol. 160.

Prichard Committee for Academic Excellence. 1999. *Gaining Ground: Hard Work and High Expectations for Kentucky Schools.*

Thomas B. Fordham Foundation. 2000. *The State of State Standards, 2000: English, History, Geography, Mathematics, Science.*

ERIC currently indexes more than 1,081 education-related journals. The clear-inghouses cover the journals in their scope areas and add new journals when appropriate. Many journals are indexed cover to cover, whereas others are indexed selectively. Journal articles comprise approximately 60 percent of the ERIC database.

Documents other than journal articles comprise approximately 40 percent of the database. ERIC systematically acquires most documents via acquisition arrangements with information providers such as universities and other research organizations, associations, commercial publishers, and state and local educa-tion agencies. The ERIC Facility and the clearinghouses formed 159 new ac-quisitions arrangements in 2000 for a year end total of 2,504 arrangements. In 2000 the Facility introduced a new Web-searchable ERIC Acquisitions Arrangements Database that enables the clearinghouses to check existing arrangements and avoid duplication.

In addition to these standing acquisitions arrangements, ERIC aggressively solicits education-related material from new sources and accepts unsolicited documents for review. However, inclusion of submitted documents in the ERIC database is not automatic; all documents are evaluated by subject-matter experts at the ERIC Clearinghouses. First and foremost, a document selected for ERIC must be clearly linked to the process or practice of education. In addition, every document sent to ERIC is evaluated for quality of content, including contribution to knowledge, significance, relevance, newness, innovativeness, effectiveness of presentation, thoroughness of reporting, relation to current priorities, timeliness, authority of source, intended audience, and comprehensiveness. All documents must meet standards for legibility and reproducibility, and must be available from either the ERIC Document Reproduction Service (EDRS) or another source.

Database Content

ERIC catalogs bibliographic records in its database by describing records according to type of publication. In 2000, more than 90 percent of the docu-ments and articles entered in the database were categorized as research/technical reports, descriptive reports, evaluative/feasibility reports, guides (including administrative and teaching guides), speeches, conference papers, viewpoints, or books.

Documents produced or funded by the Department of Education are given spe-cial priority in the database. The ERIC Facility reports that 1,329 Department documents were entered into the database in 2000—approximately 14 percent of all documents entered. In 2000, a special initiative was conducted jointly by the Facility and the Department of Education's (ED's) Office of Educational Research and Improvement (OERI) to ensure that documents from OERI Regional Educational Laboratories are entered into the ERIC database. Cur-rently, documents from the laboratories are mailed directly to the ERIC Facility for assignment to the appropriate ERIC Clearinghouse. Each document carries a
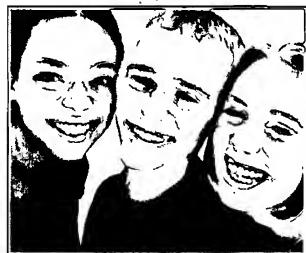

Thank you so much for responding to my query on grading systems for tech-nical college courses. My institution has recently gained Technical College status, and we are in the process of evaluating students and assigning grades for each course. I really appreciate your attention to this matter, and thank you for the information and useful Internet resources.

—*Message sent to the ERIC Clearinghouse on Assessment and Evaluation*

ANNUAL REPORT 2001

ERIC

transmission memo from the Facility marking it for special attention during the clearinghouse document selection process.

Examples of Department of Education Publications Entered in ERIC in 2000

Elementary and Secondary Education: An International Perspective

Participation in Adult Education in the United States: 1998–99. Statistics in Brief

Standards for Foreign Language Learning in the 21st Century

Who's Teaching, and Who Will Teach, Vocational Education?

Thank you for providing me with your most recent packet of products that were produced by the ERIC Clearinghouse on Adult, Career, and Vocational Education. As always, the materials are very well prepared and will be very useful for our work with migrant and seasonal farmworker families.

—A message from a director of a migrant center sent to the ERIC Clearinghouse on Adult, Career, and Vocational Education

In 2000, the highest numbers of document entries into the database came from three scope areas: reading, English, and communication (929 documents); adult, career, and vocational education (916 documents); and elementary and early childhood education (902 documents). The largest numbers of journal articles were processed in the scope areas of science, mathematics, and environmental education (2,248 articles); information and technology (2,161 articles); and reading, English, and communication (1,950 articles).

Database Access

The ERIC database is available for public access on the Internet. For example, a social studies teacher interested in using primary sources could go to www.eric.ed.gov and click on "Search ERIC Database." By performing a keyword search using terms such as "primary sources," "heritage education," and "United States History," the teacher could locate practical materials such as a series of teaching guides from the National Park Service highlighting national historic places.

Teachers, researchers, and others interested in education can also search ERIC at more than 1,000 public and university libraries as well as at Federal Depository Libraries. ERIC records are published in two print indexes—*Resources in Education (RIE)* and *Current Index to Journals in Education (CIJE)*—as well as online (via the Internet and commercial services) and on CD-ROM. Currently, six online vendors and three CD-ROM vendors offer access to the ERIC database, including the ERIC Processing and Reference Facility, which offers a CD-ROM subscription for $100 per year.

Because the ERIC database is accessible in so many ways, it is impossible to gather complete statistics on how many searches are run each year. Three ERIC host organizations provide access to the database: the ERIC Clearinghouse on Assessment and Evaluation (http://searcheric.org), the ERIC Clearinghouse on

Information & Technology (http://ericit.org/searcheric.shtml), and EDRS (http://www.edrs.com/webstore/search.cfm). These organizations reported a combined total of 8,446,758 ERIC searches run in 2000—an average of 703,897 searches run each month.

Who searches the ERIC database? One study of ERIC database users, conducted by the ERIC Clearinghouse on Assessment and Evaluation, revealed that 36.6 percent are researchers or professors, 24.3 percent are college students, 23.1 percent are K–12 teachers or administrators, 14.7 percent are "others" (including parents, college librarians, and journalists), and 1.3 percent are K–12 students. (See page 19 for additional information on who uses ERIC.)

Document Delivery

Access to copies of ERIC documents is provided by EDRS, which experienced a banner year for electronic services in 2000. The ERIC E*Subscribe service, which provides access to electronically releasable ERIC documents by subscription, increased its customer base by 226 percent, growing from 134 customers at the beginning of 2000 to a year-end total of 438 customers (409 U.S. and 29 international).

E*Subscribe's customers comprise 4-year colleges and universities (84.5 percent); community colleges (4.8 percent); K–12 institutions (6.8 percent); and public, special, and corporate libraries (3.9 percent). This service provides direct access to electronic copies of more than 77,000 publications (more than 85 percent of the releasable ERIC documents produced since 1993) to more than 4 million students, faculty, and other patrons. Patrons at subscribing institutions can search the ERIC database and download ERIC documents in Adobe's Portable Document Format (PDF). A total of 192,000 ERIC documents were downloaded through E*Subscribe in 2000.

E*Subscribe's popularity has caused the number of ERIC Standing Order microfiche subscriptions to decline from 950 in 1999 to 886 in 2000. Of the 64 institutions that canceled microfiche subscriptions, 62 transferred to E*Subscribe.

Despite the high interest in electronic document delivery, EDRS continues to fill many on-demand orders for paper and microfiche copies of ERIC documents. In 2000, customers ordered 44,926 copies of ERIC documents, up 51.2 percent from 1999. Of these requests, 54 percent were for paper copies, 28 percent were for electronic copies, and 18 percent were for microfiche.

I must say the National Council of La Raza is very thankful for your wide range of help. While the research I have been doing has been hard to dig up, you have led me to areas or organizations I have not contacted. Thank you so much for your work. It makes researchers and policy analysts...very grateful that there are services out there that do help promote and foster knowledge. Thank you once again for you help.

—A researcher at the National Council of La Raza in a message to the ERIC Clearinghouse on Languages and Linguistics

Information Sharing

ERIC participates in partnerships for information exchange with other national libraries and sponsors of databases and international collections. This section lists just a few examples.

Each year, appropriate records from the ERIC database are provided to the United Nations' Educational, Cultural, and Scientific Organization/International Association of Universities' (IAU's) *International Bibliography of Higher Education.* In 2000, 942 ERIC document records and 1,387 ERIC journal article records were delivered to IAU.

At the 2000 ERIC Technical Meeting, panelists from the National Library of Medicine, National Agricultural Library, and American Psychological Association joined the ERIC Facility to discuss processing of electronic documents and journal articles for large bibliographic databases such as MEDLINE, AGRICOLA, and PsycINFO.

Representatives from Australian Education Index, British Education Index, and Canadian Education Index participated in ERIC's Vocabulary Review Group, which provides guidance on additions and changes to the *Thesaurus of ERIC Descriptors.*

The Online Computer Library Center (OCLC) is investigating a mapping between the *Thesaurus of ERIC Descriptors* and the Dewey Decimal Classification system.

I teach all of my freshman education students about ERIC. It's one of the first things they learn in my classes.

—*Comment to the ERIC Clearinghouse on Teaching and Teacher Education from a postsecondary faculty member*

Systemwide Improvements

New developments are under way that will improve the timeliness and accuracy of the ERIC database and expand the database content to include more types of electronic materials. The ERIC Facility is developing an online data entry system that will automate data input and validation and streamline document processing. Clearinghouses will catalog, abstract, and index directly into this new Web-based system, which will feature error and duplicate checking, online access to descriptors and identifiers with cut-and-paste routines, spell-check, and access to various editorial help tools. In addition, the system will accept uploads of various digital file formats, including PDF, HTML, XML, video, and audio, which will move ERIC from a largely paper-based system to an electronic system that provides more comprehensive coverage of education-related material. The Facility will work closely with three to six ERIC Clearinghouses on the initial development of the new system and anticipates that final implementation and training for the entire ERIC system will occur in late 2001.

ERIC Products

In addition to building the ERIC database, the ERIC Clearinghouses analyze and synthesize literature in their areas of expertise and create research reviews, bibliographies, interpretive studies of high-interest topics, digests, and other publications that meet the information needs of the wide spectrum of ERIC users. In 2000, the clearinghouses and ACCESS ERIC produced 536 information products. These products are noteworthy for the collaborative ways in which they are produced, the extensive networks through which they are distributed, and the attention they receive from a variety of audiences. Many publications result from partnerships among ERIC Clearinghouses and professional associations, private publishers, academic institutions, and other organizations. All clearinghouse products are reviewed by two subject matter experts prior to publication. Titles of ERIC bestsellers for 2000 are listed on pages 12–17.

ERIC also produces electronic products such as peer-reviewed electronic journals, virtual libraries, and numerous specialized directories. The clearinghouses collaborate with ACCESS ERIC to produce a series of Parent Brochures and *The ERIC Review*, a free journal for practitioners that reports critical trends and issues in education. In 2000, issues of *The ERIC Review* addressed "School Safety," "Early Intervention: Expanding Access to Higher Education," and "A Developmental Path to Reading."

In 2000, the ERIC Clearinghouses produced more than 175 ERIC Digests. These popular, two-page products summarize the most current information available on specific education issues and topics. Topics are determined by examining research trends in documents and articles acquired for the database, questions most frequently asked by ERIC customers, and suggestions from the National Clearinghouse Committees. Digests are typically presented in question-and-answer format and always include additional resources for further research. Several types of digests are available including overviews, fact sheets, issues (defining and describing a controversial topic), practice applications, research findings, syntheses of syntheses, and resource summaries.

Titles of the ERIC Digests produced in 2000 appear on pages 12–17. The complete text of more than 2,300 ERIC Digests can be found on CD-ROM versions of the database and on the Web at http://www.ed.gov/databases/ERIC_Digests/index.

User Services

C onsistent with its mission to increase and facilitate the use of educational research and information on educational practice, ERIC provides extensive user services to the public. These include reference and retrieval services, access to Internet resources, literature searches, bibliographies, identification of popular documents, and referrals to other sources of information.

Since 1987, the ERIC program has committed itself explicitly to reaching and serving more diverse audiences. In addition to researchers and graduate students, ERIC has broadened its services to teachers, policymakers, journalists, parents, students, and the general public. Although ERIC has embraced the latest technological innovations to disseminate information, it is equally proud to have a network of experts available to users. ERIC staff receive and answer requests via toll-free phone calls, faxes, mail, and e-mail as well as in person at clearinghouses and conferences. Figure 1 shows user request statistics for 2000.

Thanks so much for your research. I am amazed that such a service exists at all, let alone with the high-quality effort that you've delivered.

—*A message sent by a graduate student and pre-K teacher to the ERIC Clearinghouse for Community Colleges*

Figure 1: How Users Contacted ERIC Components in 2000

| Method	Number	Percent
E-mail*	109,761	66.3
Phone	35,007	21.1
Letters/Fax	15,680	9.5
Visits	5,130	3.1
Total	165,578	100.0

*The e-mail category includes 38,422 AskERIC requests.

Since 1992, the AskERIC service has responded to more than 238,000 questions sent via e-mail. Anyone can send an education-related question to askeric@askeric.org and expect to receive a reply within two business days.

The ERIC system responds to user requests by answering queries; sending out materials such as ERIC Digests, newsletters, and bibliographies; searching the ERIC database and other ERIC-produced databases and directories for relevant information; and providing referrals to other education-related organizations.

ERIC Clearinghouses are contacted by a broad spectrum of users. Most users are faculty and students from either K–12 or postsecondary schools. Figure 2 shows the percentages of several types of users; however, note that these statistics are based primarily on people who call, write, or visit. It is difficult to capture demographic data on the thousands of users who send e-mail requests, visit ERIC exhibits at conferences, search the ERIC database, or obtain ERIC information via the Internet, so many of these users are categorized as "General Public." (See also page 9 for information on who uses ERIC.)

Figure 2: Types of Users Who Contacted ERIC Clearinghouses in 2000
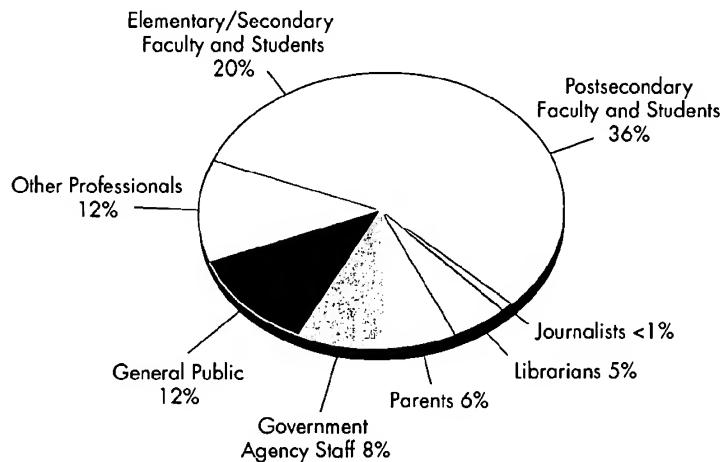

Elementary/Secondary Faculty and Students 20%

Postsecondary Faculty and Students 36%

Other Professionals 12%

Journalists <1%

General Public 12%

Librarians 5%

Parents 6%

Government Agency Staff 8%
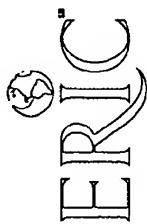

ERIC

Highlights of ERIC Components' Accomplishments in 2000

Throughout 2000, ERIC Clearinghouses and support components introduced new products and services to bring ERIC users more online full-text resources, new publications on cutting-edge issues in education, and a more comprehensive ERIC database. The highlights in this section provide a snapshot of system improvements.

Adult, Career, and Vocational Education

(Ohio State University)

Developed and disseminated 35 new user products. These products were added to the clearinghouse Web site and announced on numerous listservs. Customers are able to acquire either electronic or paper copies.

Added a section of Web site links to full-text resources in the adult, career, and vocational education fields (http://ericacve.org/fulltextresource.asp).

Assessment and Evaluation

(University of Maryland, College Park)

Significantly expanded *Practical Assessment, Research & Evaluation* (PARE), the clearinghouse's online, peer-reviewed journal (http://ericae. net/pare). In the 15 months since the journal's debut, the 85 practitioner-oriented articles in PARE have been downloaded more than 340,000 times.

Formed strategic alliances with Worldlingo.com to provide multi-lingual access (Spanish and German) to the ERIC database and with eLibrary to provide access to popular journal literature (http://searcheric.org).

Responded to the huge interest in high-stakes testing of K–12 students by developing resources such as frequently asked questions (FAQs) on test preparation and state assessment programs (http://ericae.net/faqs) and adding relevant research and technical reports to the online library (http://ericae.net/ftlib.htm).

Community Colleges

(University of California at Los Angeles)

Dramatically strengthened the clearinghouse's relationship with the Council for the Study of Community Colleges, the nation's premier organization of community college scholars. New joint efforts include enhanced communication with members, increased submissions of conference papers to the ERIC database, and a vastly improved Web site (http://www.cscconline.org), which provides members with up-to-date information on job openings, conferences, and new scholarly publications.

Set up 19 listservs that function as a quick-reference service for the clearinghouse's users and provide article summaries for keeping up to date with community college-related journals. In 2000, the clearinghouse distributed 1,428 abstracts through these listservs.

Compiled a Web-based list of nearly 50 programs that offer leadership training to community college administrators as well as research-focused, degree-granting programs for scholars in the field.

Counseling and Student Services

(University of North Carolina at Greensboro)

Collaborated with the American Counseling Association to produce a Web site (http://cybercounsel.uncg.edu) to supplement a major publication, *Cybercounseling and Cyberlearning: Strategies and Resources for the Millennium.* Both the Web site and the publication were unveiled at the American Counseling Association's annual conference. Sales of the publication surpassed all previous conference book sales.

Updated, expanded, and redesigned the format of the ERIC/CASS Virtual Libraries Web site (http://ericcass.uncg.edu/virtuallib/newlibhome.html). The libraries provide full-text resources on critical issues in counseling and education, including bullying, conflict resolution, cultural diversity, depression and suicide, juvenile boot camps, school violence, student achievement, substance abuse, and youth gangs.

Established a partnership with the consortium of three professional career counseling associations that sponsors the annual International Career Development Conference and jointly published a preconference publication that was distributed to the 1,000 conference participants and that will be entered into the ERIC database in 2001.
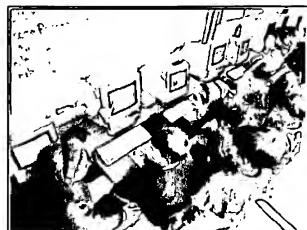

Thanks a million for your help finding engineering projects for our middle school competitions. The Internet can be overwhelming for teachers when you have to wade through tons of sites to find the information you want. I really appreciate your efforts to make this process much more efficient for me. Keep up the good work.

—A comment from a middle school teacher to AskERIC

ERIC

Disabilities and Gifted Education

(Council for Exceptional Children)

Completed *Educating Exceptional Children: A Statistical Profile*. This publication provides statistical snapshots of the numbers of children receiving special education services, the professionals who work with these students, and some of the associated costs. Services for gifted students are also included.

Completed *Serving the Underserved: A Review of the Research and Practice in Early Intervention for Culturally and Linguistically Diverse Young Children*. This publication is the result of work accomplished by the Culturally and Linguistically Appropriate Services project of the Early Childhood Institute-University of Illinois and numerous collaborators, including the ERIC Clearinghouse on Elementary and Early Childhood Education and the University of Wisconsin–Milwaukee.
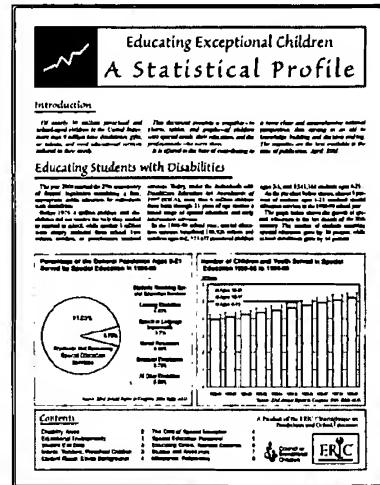

Began disseminating, on a monthly basis, summaries of the items processed for the ERIC database. This information is disseminated as advance notice to the Regional Resource Centers and other clearinghouse partners that are interested in the most recent professional literature.

Educational Management

(University of Oregon)

Printed five Spanish ERIC Digests for dissemination by the Latin American Center for Development, Education, and Culture in Valparaiso, Chile. The center, located at the state-run Universidad de Playa Ancha, distributes Spanish translations of the Digests to 2,000 education sites in Chile and other South American countries.

Contributed three articles to professional journals: "Key Questions About School Safety: Critical Issues and Recommended Solutions," *NASSP Bulletin*, March 2000; "The Path to Comprehensive School Reform," *Educational Leadership*, April 2000; and "The Accountability Challenge: Who's in Charge?" *Principal Leadership*, November 2000.

Published a *Policy Report* on class size, and mailed a complimentary copy, along with a news release, to the chief education official of each state, the education editors of selected national publications, the directors of organizations that have an interest in class size research or policy, and members of the clearinghouse's National Clearinghouse Committee.

Elementary and Early Childhood Education

(University of Illinois at Urbana–Champaign)

Participated in a record number of conferences and meetings in which ERIC materials and information were shared with attendees (86 events).

Increased awareness of ERIC and clearinghouse services with an appearance by Lilian Katz on NBC's *Today Show* in August on the "academic redshirting" phenomenon.

Published the third *Project Approach Catalog,* a guide for teachers implementing the Project Approach in pre-K and K–6 classrooms.

Higher Education

(George Washington University)

Published a variety of books, reports, and bibliographies. These include seven new monographs in the *ASHE-ERIC Higher Education Report Series,* eight new *ERIC Trends*—(reports summarizing the trends appearing in recent higher education literature) and a bibliography for the Congressional Web-Based Education Commission to use in assessing critical pedagogical and policy issues affecting Web-based teaching and learning.

Entered into a partnership with Jossey-Bass Publishers to produce the *ASHE-ERIC Higher Education Report Series;* Jossey-Bass assumed responsibility for marketing and distributing the Series, while the clearinghouse retains responsibility for proposal development and editing.

Completely redesigned the clearinghouse Web site to enhance its aesthetic appeal and ease of use (http://www.eriche.org/main.html). The redesign included creating an On-Line Evaluation Center to house all forms needed for reviewing proposals and manuscripts for the *ASHE-ERIC Higher Education Report Series.* Reviewers can now print a copy of the proposal or manuscript they are to review, find all the information they need to conduct the review, and submit their comments via an electronic evaluation form.

Information & Technology

(Syracuse University)

Adapted and customized a Microsoft Access database program to improve the tracking of clearinghouse acquisitions and significantly speed up cataloging, indexing, and abstracting of journal articles and educational literature in the fields of educational technology and library and information science.

Created a new in-process database containing résumés of documents and journal articles recently processed, but not yet appearing in the ERIC database.
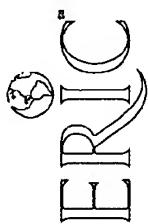

A seamless interface allows users to search clearinghouse in-process records and move by the click of a mouse to the complete ERIC database to locate processed resources (http://askeric.org/ithome/inprocess2.html).

AskERIC (http://www.askeric.org). Redesigned the AskERIC Web site. The site now features links to approximately 3,000 Internet sites, mailing lists, organizations, and discussion groups that serve the education community; more than 1,500 lesson plans; answers to 120 FAQs; and the new *AskERIC Update,* a monthly electronic newsletter that contains the latest information about AskERIC.
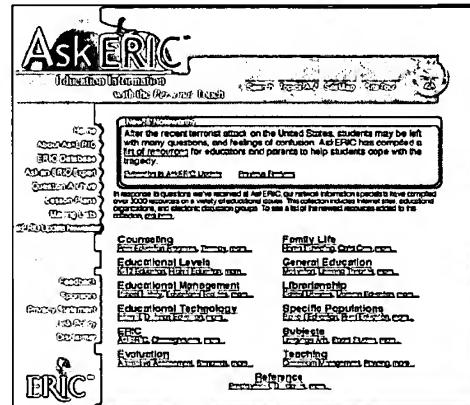

Virtual Reference Desk (VRD) (http://www.vrd.org). Conducted a major digital reference conference offering insight into the future of Internet-based question-and-answer services. The conference attracted more than 500 information professionals from libraries, government agencies, higher education, business, and other industries. Topics included software and synchronous technologies for real-time reference transactions, management and staffing issues, electronic resources, user needs in digital exchanges, legal liability, and emerging back-end applications for creating new services.

Gateway to Educational Materials (GEM) (http://www.thegateway.org). Added 6,601 lesson plans and other resources to GEM in 2000, bringing the total number of resources to 13,959. GEM developed several new partnerships in 2000, including Canadian Heritage Information Network (Learning with Museums), Northeast and Islands Regional Educational Laboratory at Brown University (Knowledge Loom), MCI WorldCom Foundation (MarcoPolo), and NASA Office of Space Science (Space Science Education Resource Directory).

Languages and Linguistics

(Center for Applied Linguistics)

Launched the *Professional Practice Series,* a series of books designed for foreign language and ESL teachers and school and district administrators. Information about the first book in the series, *Lessons Learned: Model Early Foreign Language Programs,* and a list of forthcoming titles are available at www.practiceseries.com.

Developed, in collaboration with the National Clearinghouse for Bilingual Education, the *Directory of Resources for Foreign Language Programs* (http://www.cal.org/ericcll/ncbe/fldirectory), an online, searchable directory of resources for foreign language professionals. The directory includes information

about and links to national organizations and professional associations, Web-based curricula and instructional materials, and electronic listservs.

Published, in collaboration with the U.S. Department of Education's Improving America's Schools Act initiatives, a series of papers titled *What Teachers Need to Know About Language.* The series helps teachers in mainstream classrooms work effectively with students who are not native English speakers. These papers are available at http://www.cal.org/ericcll/teachers.

Adjunct ERIC Clearinghouse for ESL Literacy Education. Expanded the adjunct's Web site (http://www.cal.org/ncle) to include resource compilations, such as annotated bibliographies; an annotated list of National Center for ESL Literacy Education publications and of commercial publishers; overviews of articles, organizations, and reports; and other resources available on the Internet. Resource collections completed in 2000 are "Assessment and Evaluation in Adult ESL" and "Learning Disabilities and Adult ESL."

Published the best-selling book *Assessing Success in Family Literacy and Adult ESL* (edited by Daniel Holt and Carol Van Duzer).

In collaboration with Teachers of English to Speakers of Other Languages, the National Institute for Literacy, and the National Coalition for Literacy, wrote *Vision and Action Agenda for Adult ESL Language and Literacy Instruction.* This paper, sponsored and developed as part of the work of the National Literacy Summit (1999), is ancillary to the *Action Agenda for Adult Literacy.*

# Reading, English, and Communication Skills

(Indiana University)

Designed and launched a Web-based phonics course for in-service and pre-service teachers in Indiana (http://eric.indiana.edu/phonics).

For the Indiana Department of Education, designed and launched a character education database/Web-based resource center, which pays special attention to the role of literature in the character education curriculum. This project involves close collaboration with the ERIC Clearinghouse on Social Studies/Social Science Education and the Anderson University Center for Character Development.

Initiated the clearinghouse's first Web-based book, *Writing for School and Workplace.* The book is a teacher's guide to an overall instructional strategy for workplace writing—memos, reports, and summaries—with related activities for middle and secondary school students.
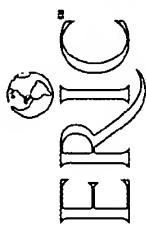

Rural Education and Small Schools

(AEL, Inc.)

Held four weeklong online forums, which were moderated by respected scholars and education leaders and included participants from across the country. Topics of these lively forums included how to support Latino students' transition from high school to college, how to improve the identification and recruitment of migrant students, how to scale down large rural and urban high schools, and how to provide better educational support for rural and American Indian community development and self-determination.
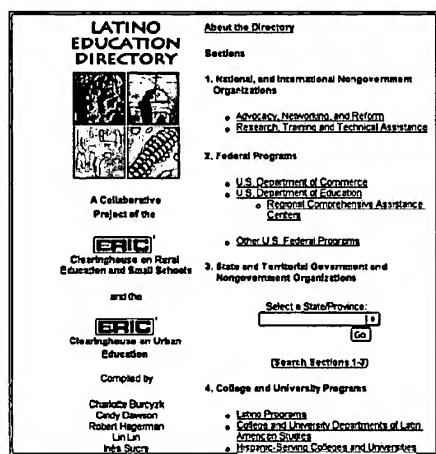

Added four more searchable directories to the clearinghouse Web site relating to

☐ Outdoor and experiential education (developed in collaboration with the Association for Experiential Education).

☐ Rural education (in collaboration with the Rural Specialty at AEL, Inc. and the National Rural Education Association).

☐ Migrant education (developed in collaboration with the Office of Migrant Education).

☐ Latino education (developed in collaboration with the ERIC Clearinghouse on Urban Education).

Saw a 61-percent increase in accesses to the clearinghouse's Web pages. Respondents to an online survey indicated a very high degree of satisfaction with services and products provided by the Web pages and clearinghouse staff.

Science, Mathematics, and Environmental Education

(Ohio State University)

Completed a major publication titled *Developing Teacher Leaders: Professional Development in Science and Mathematics.*

Published 10 ERIC Digests, including *Action Research in Science Education* and *Using Spreadsheets in Mathematics Education.*
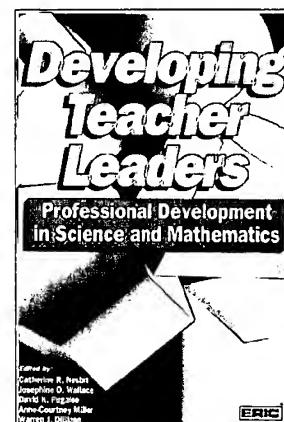

Social Studies/Social Science Education

(Indiana University)

Provided a Social Studies Standards and Curriculum section for the clearinghouse Web site, which contains links, where available, to national and state art,

civics, economics, geography, history, music, psychology, and social studies education standards and curriculum frameworks on the Internet (http://www.indiana.edu/~ssdc/stand.htm). This unique set of links has been referenced in social studies journals. It was the most frequently visited content section of the clearinghouse's Web site, receiving 10,140 hits.

Received notification that the clearinghouse's Web site was awarded a five-star rating by Schoolzone. Schoolzone identifies safe, differentiated, commercial-free Internet materials that teachers, parents, and students can easily access and distributes the URLs for these sites to all schools in the United Kingdom.

Teaching and Teacher Education

(American Association of Colleges for Teacher Education)

Copublished, with the American Association of Colleges for Teacher Education, a new publication titled *Assessing the Impact of Professional Development Schools* by Lee Teitel and Ismat Abdal-Haqq.

Developed a new series of online, interactive, full-text articles titled *E-Primers* (www.ericsp.org/pages/digests/eprimers.html). In 2000, published three articles: *Health Fitness Professional Certification, A National Dialogue on Professional Development,* and *A Model for Technology Integration in Teacher Education Programs.*

Urban Education

(Teachers College, Columbia University)

Published the following papers on the education of specific ethnic minority students: "Straddling Two Worlds: The Experience of Vietnamese Children in the United States" ED 439 180 (monograph); "School Practices To Promote the Achievement of Hispanic Students" ED 439 186 (digest); and "New Trends in Language Education for Hispanic Students" ED 442 913 (digest).

Collaborated with the ERIC Clearinghouse on Rural Education to create an electronic directory of information sources on the education of Latino students, with links to other sources of information. It is accessible on the two clearinghouses' Web sites (http://eric-web.tc.columbia.edu and www.ael.org/eric).

Issued a comprehensive analysis of current practices in urban school reform titled *Making Comprehensive Urban School Reform Work.*

Thank you for the advanced search you performed for me last week. I think I can do it next time, but I am glad that you and other ERIC assistance are available. I am in the process of ordering from the 23 records you e-mailed to me. Thank you again!

*—Message sent to the ERIC Clearinghouse on Educational Management*
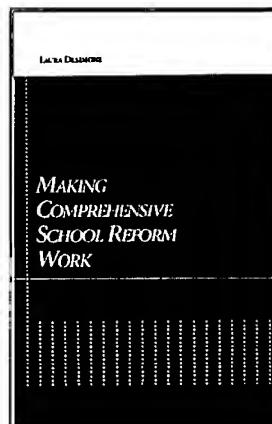

ACCESS ERIC

Redesigned the ERIC systemwide Web site (http://www.eric.ed.gov) to provide weekly ERIC news updates and to ease access to the ERIC database and ERIC Clearinghouses' Web sites.

Published three issues of *The ERIC Review* on "School Safety," "Early Intervention: Expanding Access to Higher Education," and "A Developmental Path to Reading" (http://www.eric.ed.gov/resources/ericreview/review.html).
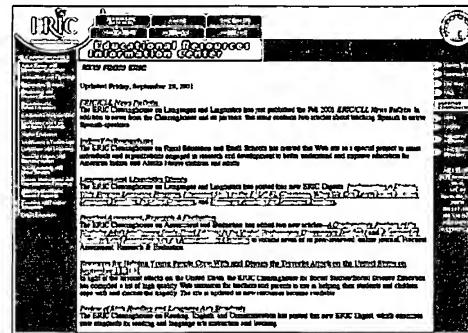

ERIC Document Reproduction Service

Added 304 new institutional E*Subscribe accounts for electronic document delivery for a year-end total of 438 accounts. This growth reflects new accounts as well as the shift of some institutions from microfiche subscriptions to E*Subscribe.

Procured and installed additional storage devices, servers, and network capacity to support the growing electronic archive and increased demand resulting from the expanding use of E*Subscribe and other Web-based services. EDRS added 7,763 document images to the electronic archive in 2000.

Exhibited at 6 library and education conferences, gave 3 conference presentations, mailed more than 100,000 promotional pieces to educators and librarians, and ran 4 paid advertisements in major journals and library directories during 2000.

ERIC Processing and Reference Facility

Released its new Web site featuring publicly available, full-text-searchable versions of the *ERIC Thesaurus* and the *CIJE Source Journal Index* (SJI). The SJI contains titles, ISSN numbers, and subscription information for the more than 1,000 journals covered by ERIC.

Federal Sponsor

The ERIC Program staff manage the ERIC system, coordinate systemwide activities, and establish ERIC system policies.

Clearinghouses

Each of the 16 ERIC Clearinghouses specializes in a different subject area of education. The clearing-houses acquire significant literature within their particular scope; select the highest quality and most relevant materials; and catalog, index, and abstract these materials for input into the ERIC database. The clearinghouses also provide research summaries, bibliographies, analyses, and many other products and services. Together, the 16 clearinghouses present the most comprehensive mosaic of education information in the country.

The two-letter acronym following each clearing-house's name indicates how the ERIC database refers to the clearinghouse. In many cases, the acronym is based on an old clearinghouse name—for example, Adult, Career, and Vocational Education used to be known simply as Career Education.

Adjunct Clearinghouses

*Adjunct ERIC Clearinghouses are associated
with the ERIC Clearinghouse whose scope
encompasses the narrower scope of the adjunct.
Adjuncts perform some or all of the following
functions in their subject areas: identifying and
acquiring significant literature within their scope
area for the ERIC database, providing reference
and referral services, providing technical assis-
tance, maintaining or contributing to Web sites,
and producing publications. They receive funding
from sponsors outside the ERIC system.*

Web: http://www.access.gpo.gov

GPO publishes and sells subscriptions to *Resources in Education (RIE).*
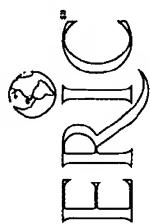

The ERIC Budget

T he ERIC system was reauthorized in 1994 as part of the Educational Research, Development, Dissemination, and Improvement Act.

The ERIC budget for fiscal year 2001 is $10.5 million. These funds are allocated as follows:

☐ 80 percent to the 16 ERIC Clearinghouses.

☐ 18 percent to the support components (ACCESS ERIC, the ERIC Processing and Reference Facility, and the ERIC Document Reproduction Service).

☐ 2 percent for system improvements, printing ERIC publications by the Government Printing Office, toll-free FTS phone lines, computer systems, and so on.

ERIC Clearinghouses use their funds for the following functions:

☐ **Database Development—23 percent**
Acquiring, selecting, cataloging, abstracting, and indexing documents and articles for the ERIC database.

☐ **Clearinghouse Management—18 percent**
Covering day-to-day operating costs including salaries, supplies, and overhead.

☐ **System Improvements and Special Projects—17 percent**
Incorporating advances in technology and major special projects, such as AskERIC and NPIN, into the ERIC system.

☐ **Publications—15 percent**
Producing ERIC Digests, major publications, bibliographies, newsletters, and journal columns.

☐ **User Services—15 percent**
Responding to e-mail, phone calls, letters, and visitors' requests for information.

Thank you so much for helping me find more references. I had found a few of the ones you sent, but not many. You made my life much easier. I appreciate your help and the service from ERIC.

—Message sent to the ERIC Clearinghouse on Higher Education

34

☐ **Outreach and Training—10 percent**
Giving workshops, exhibits, and presentations on ERIC.

☐ **Travel and Per Diem—2 percent**
Traveling to ERIC system meetings for directors and technical staff and to outreach and training events.

NOTICE

Reproduction Basis

☐ This document is covered by a signed "Reproduction Release (Blanket)" form (on file within the ERIC system), encompassing all or classes of documents from its source organization and, therefore, does not require a "Specific Document" Release form.

☑ This document is Federally-funded, or carries its own permission to reproduce, or is otherwise in the public domain and, therefore, may be reproduced by ERIC without a signed Reproduction Release form (either "Specific Document" or "Blanket").
